MECANIK® M01 (Micro Reflex Sight)

Pistol optics are designed to provide the highest probability of hitting on the targets by allowing shooters to focus quickly. The MECANIK M01 tactical micro-optic reflex sight is designed in consideration of tactical requirements. During the design process, we worked with special operation forces & law enforcement units from all over the world. It is equipped with high-tech features that will crown its unique patented exterior design. The MECANIK M01 tactical micro-optic reflex sight's TCF (Tactical Concave Face) allows operators to grasp their pistols from the slide more effectively. It also helps to rack their pistols with one hand at the waist band more successfully. Thanks to the aggressive side serrations, the grip area of the shooter on the slide has been increased. The high technology motion sensor in the MECANIK M01 helps the battery life to be preserved when the optic is not in use. Thanks to the light sensor inside, it automatically adjusts the brightness of the red dot that marks the target. This feature is especially vital for shooters working in environments with different light intensities. MECANIK M01 Tactical Micro-Optic Reflex Sight has 3 MOA red dot, which is the ideal dot size for special operation units operating intensively in urban warfare, using CQB/CQC tactics. MECANIK M01 has co-witness feature thanks to its low-profile structure. We are proud to give you the most efficient, reliable and rugged electronic sighting system in the world. Welcome to the superior way of doing things with MECANIK.

ADVANCED FIREARMS
OPTICS

Features

- ▣ 3 MOA Red dot sight
- ▣ It is designed for duty and concealed carry pistols.
- ▣ Automatic brightness adjustment(10 level)
- ▣ Thanks to the hi-tech motion sensor, it turns off when not in use. It starts working again when motion is detected.
- ▣ Low-profile design that can be used with co-witness feature.
- ▣ Thanks to its high quality super led feature, it has a clearer dot compared to its competitors.
- ▣ MECANIK M01 comes pre-zeroed out of the factory for METE series pistol.
- ▣ Parallax-free

The optic sights have been proven to be the fastest type of target engagement. It provides the greatest hit probability on targets by allowing shooters to stay focused on the target. Shooting with both eyes open also means that the shooter can situationally and environmentally remain aware of what is going on around them at all times.

MECANIK red dot sights increase shooters' confidence with their proven accuracy and performance at optimal levels. We designed our sights according to the inputs given by special forces operators and incorporating state-of-the-art technology. The unique design of our red dot optic's outer frame provides ease of racking the pistol with a single hand if needed. This sight is made to endure and work flawlessly in the most demanding operational and environmental conditions. This is why our optics are found in the arsenals of the world's greatest shooters.

MECANIK red dot sights continue to be a game-changer in tactical applications, as well as sportive shooting, home/self defense, and competition categories.

We are proud to give you the most efficient, reliable, and rugged electronic sighting system in the world.
